

# CONTENTS OF No. 399, APRIL 1996

*page*

## *Halogen Mineralogy and Geochemistry*

- |  |     |
|--|-----|
| A. D. EDGAR, L. A. PIZZOLATO and J. SHEEN: Fluorine in igneous rocks and minerals with emphasis on ultrapotassic mafic and ultramafic magmas and their mantle source regions | 243 |
| R. H. WORDEN: Controls on halogen concentrations in sedimentary formation waters   | 259 |
| W. EDMUND: Bromine geochemistry of British groundwaters  | 275 |
| P. J. TRELOAR and H. COLLEY: Variations in F and Cl contents in apatites from magnetite–apatite ores in northern Chile, and their ore-genetic implications                   | 285 |

## *Petrology*

- |   |     |
|---|-----|
| GU LIANXING and F. M. VOKES: Intergrowths of hexagonal and monoclinic pyrrhotites in some sulphide ores from Norway | 303 |
| R. A. IXER, B. YOUNG, and C. J. STANLEY: Bismuth-bearing assemblages from the Northern Pennine Orefield             | 317 |

## *Geochemistry*

- |   |     |
|---|-----|
| S. BOULT: Fluvial metal transport near sources of acid mine-drainage: relationships of soluble, suspended and deposited metal | 325 |
|---|-----|

## *Experimental*

- |   |     |
|---|-----|
| J. A. DALTON and F. G. F. GIBB: Temperature gradients in large cold-seal pressure vessels | 337 |
|---|-----|

## *Mineralogy*

- |  |     |
|--|-----|
| A. YA. MEDVEDEV: Synthetic armalcolite and pseudobrookite  | 347 |
| S. CARBONIN, U. RUSSO and A. DELLA GIUSTA: Cation distribution in some natural spinels from X-ray diffraction and Mössbauer spectroscopy               | 355 |
| Y. KAWACHI, D. S. COOMBS and H. MIURA: Noélbensonite, a new BaMn silicate of the lawsonite structure type, from Woods mine, New South Wales, Australia | 369 |

## *Short Communications*

- |   |     |
|---|-----|
| P. NIMIS, G. MOLIN and D. VISONÀ: Crystal chemistry of danalite from Daba Shabeli Complex (N Somalia)                     | 375 |
| K. LINTHOUT and W. J. LUSTENHOUWER: Subsilicic sodium gedrite in leptite of quartz keratophyric origin: Nordmark (Sweden) | 379 |
| E. E. FOORD: Clinobisvanite, eulytite, and namibite from the Pala pegmatite district, San Diego Co., California, USA      | 387 |

## *Book Reviews*
