TEACHING FELLOWSHIP IN MINERALOGY

A teaching fellowship in mineralogy has been established at Stanford University. This fellowship is open to graduate students who intend to specialize in mineralogy, and preference will be given to those who have had one or two years of graduate work. The chief duty of the fellow is to assist in laboratory instruction. Not more than eight or nine hours work a week will be required. The amount of the fellowship is \$750.

Application for the year 1937-38, accompanied by testimonial letters, should be made to Professor Austin F. Rogers, Box 87, Stanford University, California.

Dr. Reinhard Brauns, Professor Emeritus of Mineralogy and Petrography at the University of Bonn, Germany, was struck by a street car and fatally injured. He died on January 30, 1937, at the age of 75 years. Dr. Brauns was one of the Correspondents of the Mineralogical Society of America. A memorial will be published at a later date.
