Volume 35

GEOMICROBIOLOGY: INTERACTIONS BETWEEN MICROBES AND MINERALS

J. F. BANFIELD & K. H. NEALSON, EDITORS

CONTENTS

Chapter

- 1 Microorganisms and biogeochemical cycles: What can we learn from layered microbial communities?
K. H. Nealson & D. A. Stahl
- 2 Microbial Diversity in Modern Subsurface, Ocean, and Surface Environments
S.M. Barns & S. Nierzwicki-Bauer
- 3 Processes at Minerals and Surfaces with Relevance to Microorganisms and Prebiotic Synthesis
J.F. Banfield & R.J. Hamers
- 4 Spatial Relationships between Bacteria and Mineral Surfaces
B.J. Little, P.A. Wagner & Z. Lewandowski
- 5 Surface Mediated Mineral Development by Bacteria
D. Fortin, F.G. Ferris & T.J. Beveridge
- 6 Microbial Biomineralization of Magnetic Iron Minerals: Microbiology, Magnetism and Environmental Significance
D.A. Bazylinski & B.M. Moskowitz
- 7 Bacterially-mediated Mineral Formation: Insights into Manganese (II) Oxidation from Molecular Genetic and Biochemical Studies
B.M. Tebo, W.C. Ghiorse, L.G. van Waasbergen, P.L. Siering, & R. Caspi
- 8 Algal Deposition of Carbonates and Silicates
E.W. de Vrind-de Jong & J.P.M. de Vrind
- 9 Reactions of Extracellular Organic Ligands with Dissolved Metal Ions and Mineral Surfaces
A.T. Stone
- 10 The Bacterial View of the Periodic Table: Specific Functions for all Elements
S. Silver
- 11 Geomicrobiology of Sulfide Mineral Oxidation
D.K. Nordstrom & G. Southam
- 12 Biogeochemical Weathering of Silicate Minerals
W.W. Barker, S.A. Welch & J.F. Banfield
- 13 Long-term Evolution of the Biogeochemical Carbon Cycle
D.J. DesMarais

ISBN 0-939950-43-X This 448 page, paperbound book accompanied the Short Course on Geomicrobiology presented by the Mineralogical Society of America on October 18 and 19, 1997, at the Alta Peruvian Lodge in Alta, Utah. It is available from the Society for US\$32, shipping by surface book post included. Please send check, money order, or credit card information to Mineralogical Society of America, 1015 18th St NW Ste 601, Washington, DC 20036-5274, Tel: 202-775-4344 Fax 202-775-0018 e-mail: business@minsocam.org

Mineralogical Society of America Membership Application

To join the MSA, please send a completed copy of the application below, along with the required payments in U.S. funds, to the Mineralogical Society of America, 1015 Eighteenth St., NW, Suite 601, Washington, DC 20036-5274

Preferred Mailing address: _____

Name: _____ Telephone: _____
 First Middle Last
 Dr. _____ Fax: _____
 Prof. _____ First Line of Address
 Mr. _____ E-mail: _____
 Ms. _____ Second Line of Address
 Other: Specify _____ Birth Date: _____
 Third Line of Address

Membership Category: Member Life Member Student Member _____

Areas of Interest: (Circle main, check secondary) _____
 Mineralogy (MI), Crystallography/Crystal Chemistry (CC), Material Properties (PP), Igneous Petrology (IP), Metamorphic Petrology (MP), Sedimentary Petrology (SP), Geochemistry (GE), Phase Equilibria (PE), Economic Geology (EG), Clay Mineralogy (CM), Industrial Mineralogy (IM), Environmental Mineralogy (EM), Gems GM, Planetary Materials (PM), Teaching (TC), Topologic (Descriptive) Mineralogy (TP), Mineral Surfaces (MS), Biological-Mineral Interactions (BM), Others (Please indicate)

Personal Information: _____
 Highest Degree earned: Doctorate Masters Bachelors No College Degree
 Institution at which Highest Degree was earned _____ Year _____
 Employer _____ Job Title _____
 Job Function(s): _____
 What other professional societies do you belong to? _____

Student Certification: (Applicants for student membership must supply the following certification of status.) _____
 The applicant is known to me and is a bona fide student at (Name of School): _____
 Address of School (Please Print): _____

Faculty Member (Please print): _____

Signature (you need not be a member of the Society): _____

Payment: _____

 \$ _____ Diners Club American Express
 Cardholder: _____

Signature: _____

1999 Fee Schedule

Memberships are entered and renewed on a calendar basis. You will receive all publications for the year you join. Membership applications received after October 1 will be made effective January 1 of the following year unless otherwise requested. Members will receive the newsletter, *The Lattice*, as part of their dues. As an additional benefit, members may elect to receive the *American Mineralogist*, as well as some related publications, at substantially reduced rates. Please indicate all options that apply in the box to the right. Members are entitled to a 25% discount on other MSA publications given on our Publication List.

Member Dues	\$50.00
<i>American Mineralogist</i> (price to members)	\$30.00
International surface airlift service for above	\$40.00
Life Membership Dues (with journal)	\$2000
Student Member Dues (includes <i>American Mineralogist</i>)	\$30.00
<i>Mineralogical Abstracts</i> , published quarterly by the Mineralogical Society of Great Britain & Ireland	\$44.00
<i>Physics and Chemistry of Minerals</i> , published eight times a year by Springer-Verlag (*rate not yet determined)	*
<i>Journal of Petrology</i> , published twelve times a year by Oxford University Press	\$340
TOTAL	

Don't miss any of our special upcoming issues!

- Early in 1999, learn about mineral physics via the Charles T. Prewitt commemorative issue;
- Next spring, discover pegmatites in the Eugene Foord memorial issue; and
- Next fall, find out the latest about quantitative petrography in the special issue on textures of igneous and metamorphic rocks

Of course every issue of *American Mineralogist* is special and diverse, from amphiboles to zeolites. More information is available just by visiting our web site at <http://www.minsocam.org/AmMin/ammin.html>. Take a look at our abstracts, tables of contents, special features (including IMA reports) available only on the web, *complete* instructions to authors, and much, much more.

American Mineralogist

CONTENTS, VOLUME 82

January–February 1998

Numbers 1 and 2

EDITORIAL

Robert F. Dymek and Anne M. Hofmeister, editors
American Mineralogist in Transition 1

ARTICLES

Michael A. Carpenter, Ekhard K.H. Salje, Ann Graeme-Barber, Bernd Wruck, Martin T. Dove, and Kevin S. Knight

Calibration of excess thermodynamic properties and elastic constant variations associated with the $\alpha \leftrightarrow \beta$ phase transition in quartz 2

Orson L. Anderson

Thermoelastic properties of MgSiO_3 perovskite using the Debye approach 23

Gordon Moore, Torsten Vennemann, and I.S.E. Carmichael

An empirical model for the solubility of H_2O in magmas to 3 kilobars 36

Marcus Nowak and Hans Keppler

The influence of water on the environment of transition metals in silicate glasses 43

Alison R. Pawley

The reaction talc + forsterite = enstatite + H_2O : New experimental results and petrological implications 51

V. Šucha, F. Elsass, D.D. Eberl, L. Kuchta, J. Madejová, W.P. Gates, and P. Komadel

Hydrothermal synthesis of ammonium illite 58

X. Xia, D.J. Weidner, and H. Zhao

Equation of state of brucite: Single-crystal Brillouin spectroscopy study and polycrystalline pressure-volume-temperature measurement 68

Cliff T. Johnston, Jozef Helsen, Robert A. Schoonheydt, David L. Bish, and Stephen F. Agnew

Single-crystal Raman spectroscopic study of dickite 75

Mark D. Welch, Shuangxi Liu, and Jacek Klinowski

^{29}Si MAS NMR systematics of calcic and sodic-calcic amphiboles 85

Victor A. Drits, Bruno Lanson, Anatoli I. Gorshkov, and Alain Manceau

Substructure and superstructure of four-layer Ca-exchanged birnessite 97

Daniel Nyfeler and Thomas Armbruster

Silanol groups in minerals and inorganic compounds 119

Deane K. Smith, Andrew C. Roberts, Peter Bayliss, and Friedrich Liebau

A systematic approach to general and structure-type formulas for minerals and other inorganic phases 126

Asahiko Sugaki and Arashi Kitakaze

High form of pentlandite and its thermal stability 133

K. Wright, G.W. Watson, S.C. Parker, and D.J. Vaughan

Simulation of the structure and stability of sphalerite (ZnS) surfaces 141

Steven K. Lower, Patricia A. Maurice, Samuel J. Traina, and Ernest H. Carlson

Aqueous Pb sorption by hydroxylapatite: Applications of atomic force microscopy to dissolution, nucleation, and growth studies 147

Mario Tribaudino, Piera Benna, and Emiliano Bruno

Structural variations induced by thermal treatment in lead feldspar ($\text{PbAl}_2\text{Si}_2\text{O}_8$) 159

**José M. Caballero, Angeles Monge, Angel La Iglesia,
and Fernando Tornos**

Ferri-clinoholmquistite, $\text{Li}_2(\text{Fe}^{2+}, \text{Mg})_3\text{Fe}_2^{3+}\text{Si}_8\text{O}_{22}(\text{OH})_2$, a new ^6Li clinoamphibole from the Pedriza Massif, Sierra de Guadarrama, Spanish Central System 167

William D. Birch, Allan Pring, E. Maude McBriar, Bryan M. Gatehouse, and Catherine A. McCammon

Bamfordite, $\text{Fe}^{3+}\text{Mo}_2\text{O}_6(\text{OH})_3 \cdot \text{H}_2\text{O}$, a new hydrated iron molybdenum oxyhydroxide from Queensland, Australia: Description and crystal chemistry 172

Gerald Giester, Yunxiang Ni, Dietmar Jarosch, John M. Hughes, Jørn Rønsbo, Zhuming Yang, and Josef Zemann

Cordylite-(Ce): A crystal chemical investigation of material from four localities, including type material 178

NEW MINERAL NAMES 185

BOOK REVIEWS 190

LETTER

A.B. Woodland and R.J. Angel

Crystal structure of a new spinelloid with the wadsleyite structure in the system $\text{Fe}_2\text{SiO}_4\text{-Fe}_3\text{O}_4$ and implications for the Earth's mantle 404

ARTICLES

L.Y. Aranovich and R.C. Newton

Reversed determination of the reaction: Phlogopite + quartz = enstatite + potassium feldspar + H_2O in the ranges 750–875 °C and 2–12 kbar at low H_2O activity with concentrated KCl solutions 193

T.B. Bai and A.F. Koster van Groos

Phase relations in the system $\text{MgO-NaCl-H}_2\text{O}$: The dehydroxylation of brucite in the presence of $\text{NaCl-H}_2\text{O}$ fluids 205

Andrea M. Koziol and Robert C. Newton

Experimental determination of the reaction: Magnesite + enstatite = forsterite + CO_2 in the ranges 6–25 kbar and 700–1100 °C 213

Thomas Fockenberg

An experimental study of the pressure-temperature stability of $\text{MgMgAl-pumpellyite}$ in the system $\text{MgO-Al}_2\text{O}_3\text{-SiO}_2\text{-H}_2\text{O}$ 220

Jennifer M. Pickering, Brandon E. Schwab, and A. Dana Johnston

Off-center hot spots: Double thermocouple determination of the thermal gradient in a 1.27 cm (1/2 in.) CaF_2 piston-cylinder furnace assembly 228

D.B. Dingwell, K.-U. Hess, and C. Romano

Viscosity data for hydrous peraluminous granitic melts: Comparison with a metaluminous model 236

Akiko Nagasaki and Masaki Enami

Sr-bearing zoisite and epidote in ultra-high pressure (UHP) metamorphic rocks from the Su-Lu province, eastern China: An important Sr reservoir under UHP conditions 240

Fritz Finger, Igor Broska, Malcolm P. Roberts, and Andreas Schermaier

Replacement of primary monazite by apatite-allanite-epidote coronas in an amphibolite facies granite gneiss from the eastern Alps 248

Hans-Jürgen Förster

The chemical composition of REE-Y-Th-U-rich accessory minerals in peraluminous granites of the Erzgebirge-Fichtelgebirge region, Germany, Part I: The monazite-(Ce)-brabantite solid solution series 259

Martin Radvanec, Shohei Banno, and W.G. Ernst

Chemical microstructure of Franciscan jadeite from Pacheco Pass, California 273

Jianzhong Zhang, Isabelle Martinez, Francois Guyot, and Richard J. Reeder

Effects of Mg-Fe^{2+} substitution in calcite-structure carbonates: Thermoelastic properties 280

Hexiong Yang, Robert M. Hazen, Charles T. Prewitt, Larry W. Finger, Ren Lu, and Russell J. Hemley

High-pressure single-crystal X-ray diffraction and infrared spectroscopic studies of the $C2/m\text{-}P2_1/m$ phase transition in cummingtonite 288

Delphine Cabaret, Philippe Saintavit, Philippe Ildefonse, and Anne-Marie Flank

Full multiple scattering calculations of the X-ray absorption near edge structure at the magnesium K-edge in pyroxene 300

H.W. Nesbitt and D. Banerjee

Interpretation of XPS Mn(2p) spectra of Mn oxyhydroxides and constraints on the mechanism of MnO_2 precipitation 305

M.J. Scaini, G.M. Bancroft, and S.W. Knipe

Reactions of aqueous Au^{1+} sulfide species with pyrite as a function of pH and temperature 316

François Farges

Mineralogy of the Louvres Merovingian garnet cloisonné jewelry: Origins of the gems of the first kings of France 323

Andrzej Grzechnik and Paul F. McMillan

Temperature dependence of the OH^- absorption in the SiO_2 glass and melt to 1975 K 331

Yeongkyoo Kim and R. James Kirkpatrick

High-temperature multi-nuclear NMR investigation of analcime 339

Jillian F. Banfield and Takashi Murakami

Atomic-resolution transmission electron microscope evidence for the mechanism by which chlorite weathers to 1:1 semi-regular chlorite-vermiculite 348

Toshihiro Kogure and Takashi Murakami

Structure and formation mechanism of low-angle grain boundaries in chlorite 358

Mihály Pósfai and Margareta Sundberg

Stacking disorder and polytypism in enargite and luzonite 365

Mihály Pósfai and Peter R. Buseck

Relationships between microstructure and composition in enargite and luzonite 373

Halil Sarp and Radovan Černý

Description and crystal structure of Yvonite, $\text{Cu}(\text{AsO}_3\text{OH})_2\text{H}_2\text{O}$ 383

Mark A. Cooper, Frank C. Hawthorne, Andrew C. Roberts, Joel D. Grice, John A.R. Stirling, and Elizabeth A. Moffatt

Georgeericksenite, $\text{Na}_6\text{CaMg}(\text{IO}_3)_6(\text{CrO}_4)_2(\text{H}_2\text{O})_{12}$, a new mineral from Oficina Chacabuco, Chile: Description and crystal structure 390

16. Publication of Statement of Ownership
 Publication required. Will be printed in the NOV/DEC 1998 issue of this publication.
 Publication not required.

17. Signature and Title of Editor, Publisher, Business Manager, or Owner
 J. ALEXANDER SPEER, ADMINISTRATOR
Date: 9/28/98

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including multiple damages and civil penalties).

Instructions to Publishers

- Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
- In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
- Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
- If the publication had second-class authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
- In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
- Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of second-class authorization.
