

ACKNOWLEDGEMENTS

An organizing committee comprising C.J.A. Coats, O.R. Eckstrand, A.J. Naldrett (Chairman), E.F. Pattison and W.V. Peredery started planning the nickel sulfide field conference and symposium in 1974 and soon obtained sponsorship from the Mineralogical Association of Canada. This sponsorship, coupled with financial backing, an undertaking to publish the symposium proceedings, and assistance in innumerable ways from officers and executive of the association, particularly from editors, Professor R.F. Martin and Dr. L.J. Cabri, of *The Canadian Mineralogist*, have been invaluable and the committee are deeply grateful.

After approval of IGCP Project No. 161 in April, 1977, and the decision to combine the inaugural meeting of the project with the field conference, IGCP and IUGS contributed funds towards helping with travel of IGCP representatives, and the Canadian National IGCP Committee made a generous contribution towards funding the field conference. Travel funds for speakers at the symposium were also supplied through a conference grant from the National Research Council of Canada and a contribution from Falconbridge Nickel Mines Ltd. The Geological Survey of Canada, Department of Energy, Mines & Resources, very kindly agreed to provide a generous grant to

assist with this publication. Subsequently, the Geological Survey of Canada provided a supplement to its original grant.

The field conference could not have taken place without the assistance of Falconbridge Nickel Mines Ltd and INCO Metals Ltd.; the committee are most grateful to Mr. Michael Penstone and his Falconbridge staff for their assistance and hospitality in Sudbury, to Mr. Norman Anderson of INCO for his hospitality in Sudbury, and to Mr. Leo Thompson and his INCO staff for their assistance and hospitality in Thompson. Dr. Dale Pyke of the Ontario Department of Mineral Resources and Mr. Paul Coad of Texasgulf Ltd. acted as guides during certain phases of the field conference.

The Geological Society of America very kindly agreed to assist in the collection of registration fees for the symposium, and we are grateful to Mr. John Austen, treasurer of the local GSA organizing committee for arranging this.

Finally the committee chairman (A.J.N.) would like to thank Mr. J.F.H. Thompson for his unflagging help with the logistics of both the field conference and symposium and Mrs. Lillian Stewart who for four years acted as secretary for the project in addition to her normal duties.

A.J. Naldrett, *editor*.
