MSA SHORT COURSE ON MARINE MINERALS

A Short Course on Marine Minerals, sponsored by the Mineralogical Society of America, will be held at La Jolla, California, during November 2-3, 1979. It precedes the annual meetings of the Geological Society of America and associated societies in San Diego during November 5-8, 1979. Lectures, demonstrations, and exhibits are planned on the following marine minerals: phosphorite, barite, evaporites, silica polymorphs, zeolites, clays, placer deposits, iron oxides, manganese oxides, and ferromanganese deposits. The purpose of the Short Course is to provide an overview of the mineralogy, geochemistry, paragenesis, and economic potential of minerals on the seafloor or in the ocean.
