

## PUMPELLYITE

PETER A. SABINE\*

19 Beaufort Road, Ealing, London W5 3EB, United Kingdom

In their description of pumpellyite from northern Honshu, Japan, Inoue & Utada (1991) ascribe the first description of the mineral to de Roever (1947). There are, however, many earlier references to the various occurrences and parageneses, from the original description by Palache & Vassar (1925) onward. The numerous papers on pumpellyite are reviewed in the standard texts, *e.g.*, Deer *et al.* (1962, 1986) and in review-type papers by Coombs (1953) and Passaglia & Gottardi (1973). The first note of occurrences from a glaucophane schist appears to have been that of Irving *et al.* (1932). Much earlier misnamed or overlooked descriptions are listed by Coombs (1953).
