

REFEREES FOR 1997

Many people volunteer time and energy to produce this society-run journal. The editor values the assistance, advice and dedication of the board of sixteen Associate Editors listed on the inside front cover of every issue. In addition, and on behalf of the Mineralogical Association of Canada, he acknowledges with gratitude the important contributions made by all referees of scientific articles, many of whom (*) reviewed more than one manuscript in 1997.

ERRATA

In the article by Daniel E. Kile & Eugene E. Foord entitled "Micas from the Pikes Peak batholith and its cogenetic granitic pegmatites, Colorado: optical properties, composition, and correlation with pegmatite evolution" (*Can. Mineral.* **36**, 463-482, 1998), please note the following corrections: 1) In Figure 10, "rim" and "core" are transposed for the Crystal Park (no. 106) and Wigwam Creek (no. 136) samples. The correct figure is shown below. 2) Table 5 lists occurrences in order of *decreasing* values of *n*.
