

ERRATA

The title formula in Subrata Ghose and Che'ng Wan's paper on borosilicates (*Am. Mineral.* **61**, 123) was erroneously printed as $\text{NaBSi}_2\text{O}_5(\text{OH})$. The formula should be $\text{NaBSi}_2\text{O}_5(\text{OH})_2$.

In a recent paper by Moore, Araki, Kampf and Steele (1976), the Hesnard pegmatite is erroneously identified near Custer, Custer County, South Dakota. The correct location is near Keystone, Pennington County, South Dakota, more precisely SW $\frac{1}{4}$, SE $\frac{1}{4}$, sec. 17, T.2S, R.6E.

The senior author thanks Professor D. Jerome Fisher for pointing out this miserable error.
