## ERRATA

High-pressure phase equilibria of a high-magnesia basalt and the genesis of primary oceanic basalts by Don Elthon and Christopher M. Scarfe (Vol. 69, 1-16). Page 3, left column, line 3should read "Table 2" not "Table 1"', right column, line 16should read " $\approx$ " not "«". Page 6, Table 3-analyses for OPX, Spinel and PLAG (Run 333) are given below:

Table 3 (cont)
10 Kbar Run Products (cont)

| Run Number <br> Phase | $\begin{aligned} & 333 \\ & 0 \mathrm{px} \end{aligned}$ | $\begin{gathered} 333 \\ \text { Spinel } \end{gathered}$ | $\begin{aligned} & 333 \\ & \text { Plag } \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| $\mathrm{SiO}_{2}$ | 52.48 | . 37 | 50.90 |
| $\mathrm{TiO}_{2}$ | . 30 | . 49 | . 16 |
| $\mathrm{Al}_{2} \mathrm{O}_{3}$ | 5.01 | 28.56 | 31.11 |
| $\mathrm{Cr}_{2} \mathrm{O}_{3}$ | . 32 | 27.70 | . 03 |
| Fe 0 | 10.22 | 27.70 | . 32 |
| MgO | 28.79 | 12.58 | . 67 |
| Mn0 | . 21 | . 57 | . 07 |
| CaO | 1.83 | . 23 | 14.58 |
| $\mathrm{Na}_{2} \mathrm{O}$ | . 14 | . 00 | 2.29 |
| Sum | 99.30 | 98.20 | 100.13 |
| Mg-number | 83.4 | 44.7 | (An 77.9) |
| Wt.\% of phase | 23\% | 4\% | 4\% |

Titanian taramellites in western North America by John T. Alfors and Adolf Pabst (Vol. 69, 358-373). On page 372, column 1, line 3-anandite is misspelled "anadite".
The heat of fusion of fayalite by J. F. Stebbins and I.S.E. Carmichael (Vol. 69, 292-297). On page 296, there is a reference to "Fleischer, M., Cabri, L. J., Chao, G. Y., and Pabst, A. (1978)." The reference should be only to the abstract by G. Y. Chao on pages 424-425 of Am. Min., 63, 1978 (abstract only was seen).
The crystal chemistry of shcherbinaite, naturally occurring $\mathrm{V}_{2} \mathbf{O}_{5}$ by John M. Hughes and Larry W. Finger (Vol. 68, 1220-1222). Figure 1 is missing the following portion of the figure explanation which goes under the figure from left to right:
$\mathrm{V}_{6}^{5+} \mathrm{O}_{15} \quad x$ value in $\mathrm{Na}_{x} \mathrm{~V}_{x}^{4+} \mathrm{V}_{6-x}^{5+} \mathrm{O}_{15} \quad \mathrm{Na}_{6} \mathrm{~V}_{6}^{4+} \mathrm{O}_{15}$
New Mineral Names: Terskite* by Michael Fleischer (Vol. 69, 212). Dr. E. H. Nickel has kindly pointed out that the strongest X-ray lines were given incorrectly. The strongest lines (Alluair sample) are: $4.84(64)(211), 3.31(100)(022,202,041,240)$, $2.716(68)(250), 2.610(76)(042,511), 2.554(76)(251,440)$, 2.102(64)(442,070).

CONTENTS, VOLUME 68 (page 1270). The fourth article of the November-December 1983 issue is by C. M. Scarfe et al. not C. M. Searfe et al.

Davreuxite: a reinvestigation by André-Mathieu Fransolet, Kurt Abraham and Kurt Sahl. On page 782 the Sahl et al. (1983) reference should read (1984).
